

GLOBAL SPIRITUALITY, SACRED EARTH AND WORLD SHIFT

can we make the leap?

music, celebration and town meeting

Tuesday, June 10, 2014 | 7:00 pm to 9:00 pm

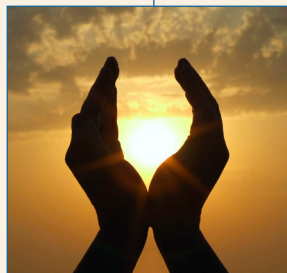

The StarHouse, 3746 Sunshine Canyon, Boulder, CO

THE PROGRAM

We live in a time where not only are individuals discovering the uniqueness and importance of their own spiritual path and practice, but the world itself is becoming more aware of:

- **Sacred Earth**, the fundamental need to sustain our planet with a rich living environment;
- An **Emerging Global Spirituality**, as our planet inevitably goes global and multicultural;
- The necessity of a profound **World Shift**, if we are to avoid calamities from a number of global cultural and climate related challenges.

This program brings together spiritual teachers and leaders from the world's interfaith and interspiritual, eco-spirituality and eco-activist, and global sustainability and social and economic justice communities for a rich evening of mind and heart sharing on the possibilities and necessities of World Shift.

We are at the dawn of a new consciousness, one that will transcend the past cultures of fragmentation and isolation...This work will be the task of an emerging "Interspiritual Age," made possible by a new set of historical circumstances. – Wayne Teasdale, Interspiritual pioneer
